commenting.sty v2.1 Feature Demo

Example Document

1 Text Tracking

Original text with added content[Alice] and ~~deleted material~~[Bob]. Multiple authors can contribute[Bob] to the same sentence.

2 Comment Types

Inline comments»like this«[Alice] appear directly in text. Footnote comments[a] keep the main text clean. The package supports[b] various configurations.

3 Multi-line Comments

»Multi-line inline comments span several lines, perfect for detailed suggestions or discussions.«[Alice]
Regular text continues here[c].

4 Colored Environments

Entire paragraphs can be highlighted with author colors and margin signatures. This is useful for marking sections under review or highlighting specific contributions. — Alice

Different authors get different colors from the colorblind-safe palette, ensuring accessibility for all collaborators. — Bob

5 Combined Features

In practice, authors combine additions[Alice], ~~deletions~~[Alice], »quick notes«[Alice], and detailed comments[d] to create a rich collaborative environment.
»Even authors without displayed signatures can contribute multi-line comments effectively.«

Note: In final mode (`[final]`), all comments vanish and only the base text with additions remains.

---

[a] »appear at bottom«[Bob]
[b] »anonymous comments too«
[c] »while multi-line footnote comments provide extended explanations without cluttering the main text.«[Bob]
[d] »with full citations or explanations«[Alice]
